Market mayhem

Markets tanked on Monday in response to the Budget's tax proposals, being spooked in particular by the sharp rise in tax incidence for foreign portfolio investors (FPIs) by way of long term capital gains (LTCG) and short term capital gains (STCG). BusinessLine reported on Monday as to how the effective rate of peak LTCG and STCG will be 14.25 per cent and 21.37 per cent, respectively, three percentage points higher than at present.

Your bank may not be recommending the right fund to you

Our Correspondent
Mumbai/July 09
When you walk into your bank branch to buy a mutual fund (MF) scheme, would you expect? You would want your relationship manager to understand your financial goals and recommend a solution that is in your best interests, right? Well, it doesn't quite turn out that way.

A compilation of data on commissions (from industry body AMFI) that distributors—including banks and brokerage houses—earned in the year of 2018-19 and the funds that they have sold, indicates that banks prefer to sell their sister firms' MF schemes more than those from other houses. It doesn't seem to matter if their in-house funds make the cut or not in terms of performance records and

a single fund house. According to AMFI data, there were 2,750 distributors who matched one or more of these criteria. We shortlisted the top 21 distributors based on the quantum of commissions that all distributors earned in the year of 2018-19.

tate-owned banks paint a poorer picture. Take Bank of India for instance. A whopping 83 per cent of its commissions came just from BOI AXA AMC. Eighty per cent of its corpus lay in BOI AXA AMC schemes, despite the bank having sold schemes from other fund houses. The fund house is going through troubled times; in June 2019, on two occasions, its credit risk debt fund fell by 15 per cent and 26 per cent in a single day.
